

## My TAS

The Time Allocation Table (TAS) is a tool used to track the time spent on various activities. It is used to calculate the time spent on each activity and to compare it to the total time available. The TAS is used to calculate the time spent on each activity and to compare it to the total time available. The TAS is used to calculate the time spent on each activity and to compare it to the total time available.

You will receive an initial email to say that they have been selected to participate in the forthcoming survey which will be conducted within your Faculty during the forthcoming academic year. You will be asked to complete four quarterly survey forms during that period.
